**1500w 800w 430mm halogen heating tube for thermoforming machine** is made of tungsten wire . Halogen quartz heating tube,put Tungsten wire in quartz tube , through lamp wire and shell make light,range of light is 2400-3500km, it belongs vacuum heating tube.

The quartz tube can use transparent quartz glass tube or ruby glass.

Halogen also is a kind of shortwave infrared emitter.This provides a very high energy source capable of responding instantly to voltage changes, allowing for precise temperature control for a variety of applications.

**Product Name**

**1500w 800w 430mm halogen heating tube for thermoforming machine**

**Material**

**transparent quartz tube/Ruby glass tube and tungsten wire**

**Type**

**straight type or round shape**

**Reflector**

**half white coated, gold coated**

**Volta...**

If you have specific design needs or want to discuss a custom project, please reach out to us.

Item	Specification
Product Type	Quartz Heater
Heating Capacity	1500 W
Power Source	Electric
Control Type	Automatic
Heating Element	Carbon Fiber
Tube Material	Quartz
Working Temperature Range	0 – 800 °C
Max Operating Temperature	700 °C
Color Temperature	2400 – 2500 K
Infrared Wavelength	2.2 – 3.5 µm
Voltage	220 V
Voltages Available	380V / 240V / 220V / 110V / 36V / 24V / 12V
Wattage Tolerance	+5%, -10%
Resistance Tolerance	+10%, -5%
Reflector Options	Gold / Ceramic / Clear
Application	Paint Drying, Heating Oven, Bathroom Heater, etc.
Weight	2 KG
Core Components	Other
Machinery Test Report	Not Available
Video Outgoing Inspection	Provided
Warranty	1 Year
